DETAILED ACTION

1. Claims 1,4,5 are allowed from previous action paper number 12. Claims 2,3,7 have been cancelled.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 6,16 is rejected under 35 U.S.C. 102(e) as being anticipated by Shimizu et al., (U.S. Patent No. 5,754,160).

As per claims 6,16 Shimizu shows an information display(element 1In Fig.1):

A display having a first and second display with scan electrodes and data electrodes (In Fig.6); the first and second display area driven by a separate driving method (In fig.6 element 32,33,33a) and first driving method and second driving method are different from each other in that a waveform applied to a selected one of scan electrodes of the first and second display area different from a waveform applied to selected one of scan electrodes of the second display area (In fig.5, 9,11).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 11,13,14,16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shimizu et al., (U.S. Patent No. 5,754,160) in view of Fergason (US 202/0075202).

As per claims 11,13,16 Shimizu shows a first second display device having displaying method (In Fig.5, 6) and display is different type of from the second display (In Col.3 lines 10-15, animation display and still image). Shimizu does not show a reflective display. Fergason shows a reflective display. It would have been obvious to one of ordinary skill in the art, at the time of the invention was made to allow the teaching of Fergason's into display device of Shimizu because it would have enhanced the display device and switch the dynamic operation of the image developing.

As per claim 14, Shimizu shows first and second display overlaps each other (In Fig.8, 10,9,11).

6. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shimizu et al., (U.S. Patent No. 5,754,160) in view of Fergason (US 202/0075202) and in further view of Dao et al., (U.S. patent No. 5,049,862).

As per claim 15, Shimizu shows a first second display device having displaying method (In Fig.5, 6) and display is different type of from the second display (In Col.3 lines 10-15, animation display and still image). Shimizu does not show a reflective

display. Ferguson shows a reflective display. It would have been obvious to one of ordinary skill in the art, at the time of the invention was made to allow the teaching of Ferguson's into display device of Shimizu because it would have enhanced the display device and switch the dynamic operation of the image developing. Both display system of Shimizu does not show a detachable display; Dao shows a detachable display (In Fig.1). It would have been obvious to one of ordinary skill in that art, at the time of the invention was made to allow the teaching of Dao's into combined system of Shimizu's because it would have allowed the user to hold computer by one hand and other display to write on it.

Allowable Subject Matter

7. Claims 8-10,12,17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art fails to teach or suggest a first display with a first contrast and a second display with a second a contrast and images with a three or more tones and second display with two tones and with different dot size as claimed in claims 8-10.

The prior art fails to teach or suggest a display area of second display is larger than that of first display as claimed in claim 12.

The prior art fails to teach or suggest the first display and second display are respectively for displaying a first color and a second color that is different from the first color as claimed in claim 17.
